Masonic "At Home."

Friday night last seen a big gathering of members of Meridian Lodge in Moose Hall, when the annual dance of the Lodge was held. Barth's orchestra supplied the music, and everyone had a very enjoyable time. A midnight supper was served in the lodge room by the ladies; following which dancing was resumed in the Moose hall.

A Stony Club Celebrates.

The Three Square Club of Stony Plain celebrated for the first time on Wednesday, Nov. 9. The guests congregated at the home of Mr and Mrs W J McCulla, where a few games were played. The members they proceeded to the residence of Mr and Mrs J F Clarke, where a delightful lunch was served.

The rest of the night was pleasantly spent in dancing at the Outway home.

Miss Ada Cheddle of Edmonton was the honored guest of the evening.

Those present were—

The Misses Muriel Michael, Dorothy Becker, Ema Mallack, Marie Clarke, Saunders Kierke, Madeline and Maxine McCulla, Edith Outway, Marie Gannon.

Men: Oscar Oppertshauer, Otto Wudel, Harold Outway, Edward Mayer, Magnus Larson, Louis Wudel, Edmund Leay.

Senior Hockey Notes.

The attention of the people of Stony Plain and district is drawn to the fact that next Friday, Nov. 18, there will be a wheel drive in town hall. Handsome prizes are offered, including an extra prize for a lucky ticket which will be drawn some evening. Each ticket is numbered and must be presented at door; number and purchaser of each ticket is listed for this purpose. So buy your ticket now from: W E H Lewis, Esther Dannhauser, H & L Outway. Be sure and bring your ticket.

The co-operation of everyone in town and district will be heartily appreciated as the Seniors plan to present a brand of hockey against the outside teams not heretofore seen in Stony. Watch The Sun for more news.

The local rink is nearing completion with regards to improvements and Mgr. G Zucht will soon have something to show for his early efforts.

This winter there will be better accommodation for all fans, which will entail no freezing while watching the games.

Workouts of both Senior and Junior clubs have already been held, and the future for both is more promising than ever before.

Practice games between the two clubs were held last week and a little more training will build up two good teams.

Strength And Courage.

Can we do better this week, following as we are after the observance of Remembrance Day, than reproduce in this column an editorial from the National Home Weekly, published in Winnipeg? We think not. So here it is:—

Gradually it is becoming clear to the minds of most people that conditions today are far more serious than they were during the years of the War. For then, men were buoyed up by hope. They knew that in time their troubles would be over. But no one can tell when this present misfortune will end. The mist of yesterday has become the dense black cloud of today. With many, despair has sapped the strength from courage.

It will not be out of place, then, to recall the words and deeds that during the War inspired hope and urged steadfastness. Of all the written messages there was perhaps nothing finer than the address of General Currie to the Canadian army on the eve of the great advance in March, 1918. In it he makes clear the seriousness of the struggle and the danger of defeat; he indicates the successes already won, and states the need of the moment. Finally he speaks of the reward of victory. The message will be read again with vivid recollections by those who were in the ranks in 1918. May all who read it now for the first time feel that it is equally appropriate today. The problems to be solved, the forces to be overcome, are just as real and as great, and the virtues of constancy, courage and self-sacrifice are just as necessary.

SPECIAL ORDER, March 27th, 1918:—"In an endeavour to reach an immediate decision the army has gathered all its forces and struck a mighty blow at the British Army. Overwhelmed by sheer weight of numbers the British Divisions in the line between Scarpe and Oise have fallen back fighting hard, steady and undismayed."

"Measures have been taken successfully to meet this German onslaught. The French have gathered a powerful army, commanded by a most able and trusted leader, and this army is now moving to our help. Fresh British Divisions are now being thrown in. The Canadians are soon to be engaged. Our Motor Machine-Gun Brigade has already played a most gallant part and once again covered itself with glory."

"Looking back with pride on the unbroken record of your glorious achievements, asking you to realize that today the fate of the British Empire hangs in the balance, I place my trust in the Canadian Corps, knowing that where Canadians are engaged there can be no giving way."

"Under the orders of your devoted officers in the coming battle you will advance or fall where you stand facing the enemy."

"To those who will fall I say, 'You will not die but step into immortality. Your names will not lament your fate but will be proud to have borne such sons. Your names will be revered forever and ever by your grateful country, and God will take you unto Himself.'"

"Canadians, in this fateful hour, I command you and I trust you to fight as you have ever fought with all your strength, with all your determination, with all your tranquil courage. On many a hard-fought field of battle you have overcome this enemy. With God's help you shall achieve victory once more."

The seriousness of conditions today may be observed in both national and international affairs. At home trade is languishing, the army of the unemployed is increasing, and worst of all young people just entering manhood and womanhood are being deprived of the opportunity to earn a living or to form life associations or to contribute to good citizenship. The result is a growing feeling of discontent. Each individual is inclined to blame all others for prevailing misfortunes.

Internationally the problem is even more acute. Debtor countries are refusing to pay, because they feel that they have been unjustly treated, or because they no longer have world-currency to meet the demand. Nor will tariff barriers permit payment in the form of goods. To accentuate the mischief nations are vying with nations in the production of armaments. As for over-crowded states there is no territory available for the surplus population. All of these things make for the spread of those national hatreds which are one of the causes of war. If quarrelling is easily possible when people are prosperous and inclined to be neighborly, it is almost certain to occur in violent form when they lose confidence in each other, and when extreme distress prevails.

The only way to avert disaster is the way of unselfishness and self-sacrifice. It is true today as of old that regardless of race, color or creed man is his brother's keeper. It is true now as two thousands years ago that men shall find their lives in losing them. The victories of peace are as glorious and as costly as the victories of war.

Driven by the higher motive it is easy for men to transform a world. The channels of trade will be thrown open, waste areas will be populated, armaments will be cast away, production and consumption will find a balance. Within the state, opportunities for culture and comfort will be measurably equal for all. The man at the machine will be of more value than the machine's production, the needs of the many shall be of more account than the desires of the few, the rich shall not batten on the poor, the laws of the land shall not favor the designs of the privileged class. But each man, recognizing that his neighbor has rights equal to his own, shall honor justice and practice righteousness. Thus in peace may they catch the spirit of General Currie's message. In 1918 men may be as brave, as loyal and as nobly self-sacrificing as they were in 1918. May they hear again the words: "Canadians, in this fateful hour, I command you. I trust you to fight as you have ever fought with all your strength, with all your determination, with all your tranquil courage. . . . With God's help you shall achieve victory once more."

English, German and French

English is spoken by 160,000,000 and is understood by 60,000,000 or more who do not look upon it as their native tongue. German is spoken by 60,000,000 and is understood and used by 20,000,000 more. French is spoken by 45,000,000 and understood and used by 75,000,000 more.

Shen's Auto "Shooter"

A shen automobile will "shoot" for help if equipped with the "Shen-bug" alarm, which has been perfected by a Chinese inventor in Shanghai. It is a small electrical box which can be placed anywhere in the car. A switch is turned on when the auto is parked. When the car is touched the box lets out a shriek, and will continue to do so indefinitely.

Her Heart Was Weak
Serves Study, Epilepsy

Mrs. A. Black, Walsworth, Ont., writes:—"I suffered from heart weakness, study nervous and nervous nights."

I saw your advertisement for Milburn's Heart and Nerve Pills and decided to try them although I did not have much faith, but now I am very thankful I did as they have proved of wonderful help to me.

I am now strong and well again, but am never without a box in the house."

For sale at all drug and general stores; put up only by The W. H. Milburn Co., Ltd., Toronto, Ont.

**Shen's Auto "Shooter"**

Shen's Auto "Shooter" Alarm
Patent Pending

There are two sounds against the highway on the highway. It not only mars the landscape and destroys the natural beauty of roadside scenery, but its persistence also distracts the attention of the driver of the car. Important traffic directions posted along the road are often lost in a welter of commercial signs. In the interests of safety the most conspicuous signs on the highway should be those placed there by the highway department to direct traffic.

STAIRS MADE HER GASP FOR BREATH**Penalty Of Excess Fat**

Although she has lost but 7 lbs. of her overweight, this woman finds that 7 lbs. has made a remarkable difference to her. There can certainly be nothing wrong with a reducing treatment that brings such increased energy and vigor.

Her letter reads:—"I am 28 years old and my height is 5 ft. Last year I weighed 154 lbs. For six months I have been taking a half-teaspoonful of Kruschen Salt, making no change in my diet. Now I am less round the hips, and only weigh 147 lbs. dressed. But I feel lighter and can now run upstairs, which before used to make me gasp for breath. Everyone says how well and so I look, as I am in a store and get no walking exercise at all. The results may not be startling, but the fact remains that I feel much better than of late years—not so heavy—and I now enjoy dancing."—(Miss) J. H.

Kruschen is based on scientific principle—it's an ideal blend of 6 separate minerals which help glands, nerves, blood and body organs to function properly and maintain a splendid degree of health—it builds up energy and strength all the while you're training yourself down to a point of normal weight.

Home Becomes For Paris

Electrically Lighted Ad On Eiffel Tower Changes Fourteen Times
The Citroën electrically lighted ad on Eiffel Tower split Paris into factions. The fragile artistic considered it sacrilege, the strictly practical considered it added revenue for the city. It changes 14 times—a giant race track, flashes of lightning, a constellation of stars, a sky high fountain rising and falling, etc. Only once does it burst into a full blazed spelling out of C-I-T-R-O-E-N.

OFF COLOUR?
NOW IS YOUR LIVER?

Wake up your Liver NOW
—Without Calomel

Your liver is a very small organ, but it certainly can not run digestive and eliminative organs out of order, by refusing to pour out its daily two pounds of liquid bile into your bowels. You won't completely correct such a condition by taking oil, mineral water, laxative candy or chewing gum, or ketchup. When they're moved your liver's duty is through—and you need a liver stimulant.

Carte's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. No at all druggists.

Ask the Real Facts

Customer: "You said the medicine I bought from you would live three hundred years, and it died the day after I bought it."

Dealer: "Now, isn't that too bad? The 300 years must have been up."

Cause Of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from the scourge of the bronchial tubes. It is sold everywhere.

Value Proven As Water

A Cornish baronet, who is eighth holder of the title is going to Tangle as a hotel waiter, and has pledged himself to remain for six months. He is Mr. William Loe Williams, aged 25. He was educated at Cambridge and has been an officer in the Royal Welsh Fusiliers.

Twenty-seven United States submarines are out of commission.

Landlords Would Be Protected

Quebec May Grant Them Priority Of Lien On Installment Goods

A bill that would give to landlords priority of lien on goods bought by installment, instead of the merchants who sell them, will be presented at the next session of the Quebec legislature. It is announced by Roméo Gaudry, secretary of the Property Owners' League of Montreal. Such a measure, Mr. Gaudry explained, would provide landlords with further protection against tenants who went beyond their means in the purchase of long-period-to-pay goods.

Persian Balm—there is nothing like it for creating and preserving a lovely complexion. Cooling, caressing—K soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most faded appearance. Dainty women inevitably choose Persian Balm. A velvety smooth lotion, it makes the skin rosy in texture. Recommended also to soothe and whiten the hands. Truly a perfect toilet requisite for every woman.

One Thing They Know

"People who live in these apartment buildings don't know anything about each other, I hear," said the man from the country.

"No," replied the flat dweller, "but you can't have cabbage for dinner without everybody else in the building finding it out."

John C. Calhoun, vice-president under John Quincy Adams, was the only one ever to resign from that office.

Latest Flying Invention

Newest Plane Can Be Controlled By One Finger

An aeroplane which can be flown, manoeuvred, and landed with only one finger is the latest flying invention.

The machine is of the autogyro "windmill" type and is being built under license near Glasgow.

There is only one control for all movements of the machine. Apart from the operation of opening and closing the throttle, the whole control of the craft literally can be done with one finger.

An Oil That Is Famous—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far ahead enough to attest its excellence, for in all these countries it is on sale and in demand.

Britain's longest-lived people have been found in the rural districts near Newcastle, where many people still lead quiet primitive lives.

Miller's Worm Powders work so effectively that no traces of worms can be found. The pests pass away in the stools without being perceptible. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgement there when these powders are in operation. Nothing could be more thorough or desirable than their action.

The largest valley in the Great Rift of Africa, which begins in the north of Palestine and stretches south for a distance of 3,000 miles.

ACID STOMACH

● If rich foods disagree, it need not mean a "weak stomach." Acids and gas don't mean "indigestion." Just take an anti-acid to soothe the system, and enjoy life! Before meals, or afterward when distress is felt. Be this simple, and stomach and bowels will be in fine order. Use only genuine Phillips' Milk of Magnesia. It is standard. The other preparations do not have the same anti-acid action.

Also in tablet form, Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Made in Canada

Agreement Reached At Ottawa Conference May Have Beneficial Effect On Hog Industry In Canada

That the Ottawa Economic Conference would appear to be steadily moving forward towards making effective the agreements reached there. Principal among the agreements are those affecting livestock and animal products.

The principle adopted by the Ottawa Economic Conference for the control of livestock for meat is "limitation of imports." This system of limitation of imports is being applied to all the important classes of meats—beef, lamb and mutton, hams and bacon, and certain classes of by-products.

In Canada, more has been said about the agreement on it than elsewhere. However, it would appear that the determination by Britain to limit the importation of all meats, is the really big fact to grasp. It is this fact that gives the significance to the United Kingdom to Canada of 200,000,000 pounds of hams a month and significance.

From the standpoint of the Canadian livestock industry it is important, then, that the agreement, as they apply to all classes of meats, should be known. It would appear that the United Kingdom adopted, at the Conference, the principle of limiting to each Dominion what she undertakes to do with reference to the most and most products in which each Dominion was mostly interested. This, however, does not limit the effect on any particular meat to the Dominion in which the United Kingdom declares her policy. The agreement should be viewed as a whole in order to understand the policy adopted by the United Kingdom.

The agreements apply to certain classes of meats, but for some time Britain has had restriction of imports of other classes of meats. These restrictions are mostly based on protection of the health of British livestock. In practice the restrictions restrict imports of live cattle and other meat animals to those from Ireland and Canada. Imports of fresh meats from Europe are restricted, which practically limits this import trade to the Irish Free State. These restrictions, then, already limit imports of fresh meats and live animals. Other meats enter Britain as chilled, frozen, or cured. The policy declared by the United Kingdom of Ottawa will limit the importation of these latter classes of meats.

The policy declared by the United Kingdom with regard to livestock and animal products may be summarized thus:

Live Cattle—removal of restrictions on imports of Canadian commercial cattle and, in part, on the stock that may be used for breeding.

Chilled and Frozen Beef—regulation of imports from foreign countries on the basis of an agreement reached with Australia.

Frozen Mutton and Lamb—regulation of imports from foreign countries (and from Australia and New Zealand for a period) on the basis of an agreement reached with Australia and New Zealand.

Bacon and Hams—declaration to undertake the regulation of importation of hams and hams and, on the basis of an agreement reached with Canada, to guarantee free entry for up to 2,000,000 cwt. per annum of Canadian hams and hams of good quality (200,000,000 lbs.).

The adoption, by the United Kingdom, of what would appear to be a most successful policy, was the result of a series of events and conditions. European importing countries and America had steadily been raising barriers of various kinds against the importation of animal products. Great Britain remained the only open market. Therefore, all these countries that had formerly been exporting a part, or the bulk of their products to Britain, and all the importing countries which had not formerly sent products there in quantity, were forced to reconsider their old ways of their commerce on that market.

In addition, production particularly of hams and mutton heavily increased. The collapse of grain prices which gave European hams producers very cheap feed for hogs in 1929 and 1930 induced huge increases in production, not only in the countries that had formerly been supplying the

bulk of British imports, but also in the countries that lately had been forced to send their hams to Britain. Furthermore, the new countries to enter the British hams market, such as Poland, Rumania, Lithuania, Latvia and Estonia, in order to develop the proper kind of hog and establish themselves in the British market adopted various schemes of taxation and subsidies.

Britain's declared policy gives an aspect to the future which suggests the closest study and consideration. Present prices for hams and hogs are as low as to be extremely discouraging. If the future is to be judged only by present price conditions, there is no prospect; the hog industry in all countries will die. But it is these conditions which led the United Kingdom to determine on the policy which was declared at Ottawa. Apart altogether from that declared policy, present price conditions, viewed in their proper light, are certain indications of better prices in the future.

Under extreme conditions, such as at present, the industries least suited to certain conditions always survive. Canada is one of the countries that has the natural conditions for the survival of the hog industry. The policy declared by the Government of the United Kingdom is intended to favor the survival of the hog industry of Canada.

New Cancer Begins

Everyone Should Know the Symptoms and Receive Early Treatment

Cancer never begins as cancer, Dr. Joseph C. Woodgreen, cancer research worker of Johns Hopkins University, Baltimore, told the Ottawa Medical Association.

"It begins as a single spot," he said, "and the normal cells of that spot are changed to abnormal cells, which are not cancer cells."

Chronic irritation, injury or poisoning brings such as sores or ulcers and untreated wounds anywhere are the sites in which cancer develops, the doctor continued.

He stressed it was important that everyone should know the symptoms, signs of little things that are not cancer but which may become cancer and the earliest stages of cancer are identified.

"On this fundamental advice rests the action of having an immediate examination after the first warning," he declared.

Dr. Woodgreen told his audience women suffering from early detected cancer of the breast ran to death than a 20 per cent. risk that attempts to cure them will fail, while those who defer examination through ignorance reduce their chances of cure to 10 per cent. or less.

A semi-annual examination of mothers, he said, would permit detection of spots in the cervix which are not cancer but which may become cancer or are the earliest stages of cancer. Routine treatment could then be used to cure a large percentage of the cases.

Under present conditions, he declared, most mothers seeking examination for cancer of the cervix had the disease in such an advanced stage that there was no more than a 10 per cent. chance of cure.

The Bounding Creek Map Shows

Bounding Creek is an intermittent stream rising about twenty miles north of Youngstown, Alberta, which after flowing in a westerly and easterly direction turns north again and empties into Bounding Lake. The outlet of Bounding Lake is Spirit Creek which flows northwesterly to Spirit Lake which, having no outlet, is strongly alkaline. Bounding Creek crossed about just published by the Topographical Survey, Department of the Interior, shows a considerable length of the creek from which it is named.

Shapley—Can you show a recent condition?

Applaud—Well, I was recommended to sleep by a jury man.

New Railroad Park Planned

Two Sites On Vancouver Island Are Being Considered

Establishment of a new national park in British Columbia is being considered by the Canadian and provincial governments, and F. M. Warren, chief engineer of the federal parks branch, has been on the coast recently looking the groundwork for such a project.

Garibaldi Mountain is already regarded as a site for the new park, although the parks branch is said to be eager to establish a new level park to complete the British-Canada parks system. For the latter purpose a park site on the west coast of Vancouver Island is being considered. The only other national park on Vancouver Island is Strathcona, which, however, is mountainous and somewhat inaccessible.

Colonel W. W. Foster, member of the Mount Logan expedition, of several years ago and one of the best known mountaineers in Canada, has completed a report on the Garibaldi project and this has been sent to Ottawa.

United States Rigidly Enforcing Restrictions

Immigration Figures For 1931 Are Latest On Record

Only 364 Canadians were admitted to the United States as immigrants in August, against 1,348 in August, 1931, the latter department's last monthly report shows. In the period 1925 to 1930 Canadian immigration to this country in August averaged 7,000.

Restrictions on the influx of people are being enforced even more severely than in 1931 when the number admitted was the smallest in a century. Only 3,718 from all countries passed the gates last August, as compared with 4,600 in August, 1931, and an August average of 26,000 for the years 1925 to 1930. Indications are that for 1932 aggregate immigration will not reach 25,000, which would be the lowest figure on record.

Last August 6,700 persons who had established domicile in the U.S. left to live permanently elsewhere. "The number of alien residents," says the report, "now exceeds the new arrivals by over three to one."

By use of a machine just patented in Germany, lumber may be fed into it at one end to appear on finished beams at the other at the rate of two a minute.

Antlers, one of the Bahamas Islands, has a lake which generates its own power from the alkaline batteries laid.

Distinctive Canadian Formula Is Now Used For Extraction Of Radium From Western Ores

U.S. Farm Population

Many Factors In the Last As a Result Of Hard Times

That there have resulted in a 1931 "back to the land" in the United States, statistics issued by the Department of Agriculture reveal. Present farm population of the country is estimated at 25,000,000, an increase of about 1,000,000 in three years.

Farm population in the United States reached a peak in 1920, the department says, when it was 25,077,000. Thereafter it steadily declined for twenty years as country dwellers moved into the towns to share the profits of the long industrial boom. United States citizens living on the land numbered 24,778,000 in 1920 and 20,000,000 at the start of 1931. The three-year depression has driven nearly two million people back to rural life, so that farm population now approaches its 1920 high point.

A Prosperous Town

Full-Time Job For Every Man In Carlin, N.C.

Which is the most prosperous town in Canada?

According to Thomas Uphill, labor director for Prince, B.C., the answer should go to Carlin, B.C. Every man in the town has a full-time job. Carlin is a coal mine town, and although the mine employs only 200, there are more than 200 unemployed there. The town incidentally is the only place in British Columbia where not a dollar of unemployment relief money has as yet been spent.

But just a few miles away, at Prince, B.C., is one of the poorest towns from the economic standpoint, according to Uphill. The city is unable to meet its one-third share of unemployment relief; already it is far in arrears.

Mr. Uphill created a sensation at the last session of the legislature by proposing that the government should raise money by selling wine. Wealthy men would be eager to pay a stated sum for a provincial liquor, he said.

To ward off a hail storm, peasants of western Europe used to sing balls or love songs.

A new product similar to celluloid and made of wood pulp, has been developed in Norway.

A distinctive Canadian formula for the extraction of radium from the phosphates are found at Great Bear Lake, Northwest Territories, has been developed by scientists of the Canadian Government Department of Mines, according to a statement just issued by Hon. Wesley A. Gordon, Minister of Mines. The new formula is the result of more than a year's intensive research work by scientists of the Department of Mines.

The Canadian process, according to Mr. Gordon, will permit as great, if not greater, percentage of recovery, involving a shorter time and less complicated operations than any of the known methods. Canada will, it is expected, now be able to supply not only her own radium needs for therapeutic, scientific and commercial purposes, but will be able to enter world markets.

Partly as a result of the high-grade character of the Canadian ore and partly because of the shorter time and simplified method of the new process, it is believed that the costs of radium will be considerably less than under other methods of extraction. Hydrochloric acid is used as a solvent in the new method instead of the usual sulphuric acid and a large number of steps formerly considered necessary have been eliminated. Instead of about forty operations, supposed to be used in other countries, radium salts have been produced in the laboratory of the Canadian Government Department of Mines with less than half that number of steps. The chief cost in radium reduction lies in cost of chemicals, about three times being required for the treatment of every ton of ore. The new process has been adapted to treat with almost equal success both alluvial ore and the other carbonate ore with which phosphates in Great Bear Lake field.

About 4,000 grams of radium-bearing concentrate have been obtained in the experimental work. The plant worked out at one gram of radium from two tons of phosphates from the Great Bear Lake ore. A radium refinery is to be established at Fort Hope, Ontario, where the ore will be taken for the extraction of radium and by-products, such as uranium, lead and silver.

Foster Explains Closing Of Leaves

Country To Popular Better From Its Best Cows

Jack Foster's only point to make, John Keller of the Pennsylvania State Department of Forestry said in explaining that time, not best, given forest leaves their autumn colors.

"The ripening of leaves is the cause of the change in color of the forest foliage and not the action of the frost," said Keller in depicting a popular belief.

"Frost may hasten the process of turning leaves brown. A heavy freezing in late September or early October will rather than with the leaves of their chance for brilliant coloration."

A long dry autumn with not too heavy frosts brings the best combination of colors, while clouded changes in the autumn conditions within the autumn leaf cells produce the wonderful shades of red and yellow, according to Keller.

Leaves fall from trees because they are "worn out" and have been drained of all the pulp that was stored in the tree, the forestry expert said.

Only One Answer

She—You're a good at mathematics—my little.

She—Well, go ahead.

She—Take away my last letter, take away my second letter, take away all my letters, and I am still the same. What am I?

She—That's only you're a math teacher.

A carpenter says the only way to drive a nail properly into the wall is to get the nail exactly through the wall. The nail enters through the wall and the nail is driven in.

Saskatchewan Fruit Growing Campaign

Every Assistance To Be Given In Order To Encourage Fruit Growing In The Province

According to a statement just issued by the Hon. James F. Bryant, who is in charge of the Saskatchewan Fruit Growing Campaign on the Institutional Farms of the Province, an excellent start has been made this fall.

The plans which have been carefully thought out and considered in detail for the establishment of fruit orchards on the Saskatchewan Government Institutional Farms, and for the promoting of fruit growing in Saskatchewan are now definitely being undertaken and work has commenced in connection with the trial nursery and fruit breeding grounds at Regina, and the orchards on the Institutional Farms have been laid out and will be surrounded with windbreaks either this fall or early next spring.

Over eleven hundred grafted crabapple trees, one, two, and three years old, of sixty named varieties, all on Siberian crab roots and northern grown, have been obtained and will be either planted in the Government Nurseries or distributed to the Institutional farms. Already at Battleford, an orchard plot 1,370 feet long and 376 feet wide has been laid out and planted with caragana windbreaks. Six each of thirteen varieties of hardy named crabapple trees have already been shipped to Battleford. The balance of the eleven hundred have been holed in at the Regina Nursery and will be sent out next spring. Some twenty-four hundred seedling Siberian crabs have been obtained and on these will be grafted wood of named crabapples and standard apple stock.

Some seventy-five standard apple trees in six varieties have been obtained. These are all varieties that have proven satisfactory in Manitoba and in parts of Saskatchewan where they have been tried out by private owners. All these trees are either budded or crown grafted on Siberian crabapple roots and are perfectly hardy. The majority of these apple trees will be planted in the Regina Nursery in order to get seeds for future planting and distribution.

About one hundred and eighty northern grown, one, two, and three year old plum trees, of the best varieties produced to date in Western Canada, have been obtained and were planted this fall in the Government Nurseries at Regina, to supply building material for propagating these varieties. These grafted plum trees represent thirty-six varieties. One thousand five hundred and ninety seedling plum trees have been obtained for stock or to fruit.

In addition we have obtained from the Experimental Farm at Morden, nearly nine bushels of plum seeds taken from early very hardy plum trees, as well as from a few prominent high quality, improved varieties developed on the Morden farm. The plum seed included the following varieties:

Winnipeg.....	8 pounds
Olson.....	5 "
Carstensen seedling.....	17 "
Native plum.....	150 "
Mixed plum.....	75 "
Early Nigra.....	100 "
Mammoth.....	35 "
Amelanchier seedling.....	20 "
Waneta.....	40 "
Pembina seedling.....	30 "
Cree.....	5 "
Cherry.....	8 "
Amelanchier.....	15 "

A portion of these plum pits have been planted in the Regina Nursery and the balance divided among the Institutional Farm orchards where they also have been planted. The pits are planted three inches deep about one to two inches apart in rows three feet apart so that they can cultivate between the rows, and a mulch is being put over the rows in order to retain moisture and assist in germination. Of the plum pits retained for the Regina Nursery, one half has already been planted and the other half will be stratified in wet soil and planted in the spring. A record will be kept of the best germination under each method for future work.

The apple seeds and crabapple seed will be kept in the Regina Nursery. We have obtained 240 pounds of Western grown fruit from which the seed, mostly Siberian crab, will be taken, and in addition the Experimental Farm at Indian Head has just sent three sacks of apples and boxes of apple and plum seeds. The seedlings from these will be used as root stock on which to bud the standard varieties from cuttings and buds obtained from provincial private growers, and experimental farms. We are getting bud wood from one hundred varieties of apples and grafting it on the Siberian crab seedlings next spring. We have issued a public invitation to all private orchard owners in Saskatchewan after they have eaten their apples and crabs, to save the seeds and forward them with the name of the variety to the Government Nurseries at Regina, as a voluntary contribution to the cause of fruit growing in Saskatchewan. From private sources we expect to receive much valuable material. Part of the apple and crab apple seed will be planted this fall, and the balance will be kept in a cool cellar when it will be taken out in the spring, soaked in water for two days and then planted.

Mr. J. E. Park, the provincial landscape gardener, who has had a very valuable experience in experimental fruit work, is planning to introduce a set of records in the nursery and on each Institutional Farm, where book-keeping entries will be made of each variety and the results obtained annually from same. A comparison will be made of the effect of local weather conditions at each farm on the different kinds of fruit, thus establishing the variety of each kind of fruit best suited to each locality.

When the orchard projects were first contemplated the proposals were taken up with the Hon. Robert Weir, Minister of Agriculture at Ottawa, and Dr. E. S. Archibald, Director of Dominion Experimental Farms, and both expressed their appreciation of the importance of the work, and promised their assistance and co-operation, which has been since given in a wholehearted way by them and the officials of their departments engaged in fruit experimental work in Western Canada.

Mr. W. R. Leslie, Superintendent of the Dominion Experimental work at Morden, has been especially enthusiastic and helpful. Mr. Leslie has done some of the finest work in Western Canada in the matter of fruit growing. On my visit to the Morden farm this summer to inspect the work, and ascertain the best varieties suited to the different localities in Saskatchewan in which our Institutional Farms are located, Mr. Leslie spent a full half day showing me over the orchards. He is freely giving his advice as to the best varieties and is not only sharing his experience with the Department of Public Works, but is giving us some of his best material. Saskatchewan is getting the advantage of fifteen years of fruit experimenting at the Morden farm.

We have also received very valuable assistance from Mr. F. V. Hutton of the Northern Experimental Farm, from which our young fruit trees have mostly come. Mr. William Gibson, Superintendent of the Indian Head Experimental Farm and R. Wilson, formerly of Morden Station, but now in charge of Horticulture at Indian Head, are also giving us strong encouragement in our work and are co-operating in supplying material which will be sent in and distributed to our orchards and planted in the spring. They have sent in plum, apple and crabapple seed this fall, and similar assistance in the matter of northern grown stock is being given by Superintendent Matthews of Sept-Isles Experimental station.

Professor Patterson who is in charge of horticulture at the University of Saskatchewan, is a strong exponent of the Government fruit growing campaign. He has welcomed the opportunity of having his selections from controlled crosses, originated by him at the University, tested out on the Institutional farms in the different parts of the province. Professor Patterson has given us plum seeds in addition to those already mentioned and is supplying us with raspberry plants.

About eighteen hundred raspberry shrubs of thirty different varieties and fifty-seven hundred cuttings of black, red, and white currents of twenty-four different varieties have been obtained and are being holed in and will be planted in the orchards in the spring between the rows of fruit trees. Gooseberry plants will be received from Morden farm and planted in the spring in each orchard. We have received up to date 1,320 seedlings for fruiting and experimental work.

We expect also to receive from

For COLDS

"I always use BABY'S OWN TABLETS to break up my baby's cold," writes Mrs. William Colquhoun, St. George Falls, Ont.

"When I see a cold coming on, it is to BABY'S OWN TABLETS that I turn," writes Mrs. Robert Gumbson, Philadelphia, Ont.

Mother everywhere report in the value of the safe, sure results that follow the use of BABY'S OWN TABLETS in treating children's colds, teething troubles, simple fevers, diarrhoea, stomach, colic, constipation. 25 cents.

Dr. Williams'

BABY'S OWN TABLETS

Morden in the spring, a goodly supply of grape cuttings which will include the following varieties:

Alpha, Beta, Smelter, Hungarian, Selected native grapes from Riding Mountain, and Campbell's Early.

The seeds from eleven quart of sweet blue grapes grown this year and ripened in George Watt's old garden in Regina, have been saved and are being planted. These varieties trained to the fan system which allows the trunk, have wintered well in Manitoba and have produced abundant crops of large fleshy, early maturing grapes. They will be grown on all the Institutional farms, and perogues will be erected where they can be used for ornamental work instead of Virginia Creeper, and at the same time when established will produce excellent fruit for jam, jelly and grape juice.

We therefore feel that the Saskatchewan Government fruit growing campaign is in full swing, and the plum trees which will result from nine bushels of plum pits and the other fruit trees will keep growing and supply fruit to the patients and others after many of us are dead and gone. Similar work will be done each year as it is only by growing and testing out thousands of seedlings annually that new and important varieties will be developed.

Fruit growing is the largest field for scientific and experimental horticulture that exists on the prairies. This field has not been developed in Saskatchewan up to date although here and there private individuals have done excellent work. In co-operation with the Experimental farms and University, the Department of Public Works, through the Institutional Farms, is going to use its best endeavor to encourage the growth of fruit on as many farm and home gardens as is possible in the province, in order to make the homes more attractive and to assist in diversified farming by making each home unit as self-supporting as possible. Saskatchewan fruit, as a result of our climate, sunshine and soil, is surpassed in flavor by no other fruit in Canada.

With the introduction of the fruit trees, there will be established a hive or two of bees on each farm to pollinate the fruit. If this proves satisfactory it will be the beginning of Bee culture and the production of honey on the Institutional Farms.

SUNDAY SCHOOL LESSON

NOVEMBER 20

STEWARDSHIP OF MONEY

Golden Text: "Take heed, and keep yourselves from all covetousness; for a man's life consisteth not in the abundance of the things which he possesseth."—Luke 12:15.

Lesson: Deuteronomy 8:7-18; Malachi 3:7-18; Luke 12:22-34; 1 Corinthians 16:1-4; 2 Corinthians 8:1-5; 9:1-15; 1 Timothy 6:17-19.

Devotional Reading: Matthew 6:19-24.

Explanations and Comments

Beware Of Forgetfulness Of God Because Of Pride In Possession. Deuteronomy 8:11-14.—Moses foresees that in the Promised Land which his people are about to enter they may become so prosperous as to forget God in not keeping His commandments. Against this temptation to pride (lest their heart be "filled up") because of their fine houses, numerous flocks and herds, and abundance of silver and gold, Moses warns them, and reminds them of what they owe to God who brought them out of bondage in the land of Egypt.

It Is God Who Gives the Power To Acquire Wealth. Deuteronomy 8:15.—"The first and fundamental principle of stewardship lies in God's ownership of all things. The God who created life in the beginning has a priority claim upon all life. There can be no property, either without society or without God; neither would there be value to property without society or without the God who guarantees all life."—Stewardship Lessons.

Liberality Is Blessed Of God. 2 Corinthians 9:6-11.—Generosity in giving will enrich their own lives. Paul tells the Corinthians. Should a man hoard the greater part of his supply of wheat, being loth to part with it, he would have had a scanty harvest from the small amount sowed, and the hoarded grain, if kept too long, would spoil. It is from a bountiful sowing that a bountiful harvest is reaped.

"Gifts and good deeds are seeds sown which will yield a harvest just as surely as the grains of wheat one may sow in his field. They will yield many different harvests. The blessings they carry to those who receive them is one harvest. Then the blessing that the more act of giving brings back to the giver is another; for Jesus said, 'It is more blessed to give than to receive.'—J. R. Miller.

Must You Special Stamps

Postal authorities warn the public of the use of postage stamps to make up odd amounts on postal notes. Effective November 1, odd amounts on postal notes must be affixed in special postal note stamps, purchasable in the past 500.

Devil's Food
Layer Cake
with Magic Baking Powder

"I know from experience," says the cookery expert of Western Home Monthly, "that Magic makes most baked dishes look and taste better. Its uniform leavening quality gives dependable baking results."

And Miss Dutton's praise of Magic is seconded by the majority of dietitians and cookery experts throughout the Dominion. They use Magic exclusively because they know it is pure, and always uniform.

Devil's Food Layer Cake

with Magic Baking Powder

Canadian housewives, too, prefer Magic. In fact, Magic outdoes all other baking powders combined.

For luscious layer cakes, light, tender biscuits, delicious pastry—follow Miss Dutton's advice. Use Magic Baking Powder.

FREE COOK BOOK—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ontario.

MAGIC BAKING POWDER

"Contains no alum." This statement on every tin is your assurance that Magic Baking Powder is free from alum or any harmful ingredients.

Canada's One-Cent Coin
The issue of 18,000,000 Canada one-cent pieces during the past year by the Department of Finance required 65 tons of copper and the coins placed side by side would extend 25 miles.

Try Lydia E. Pinkham's Vegetable Compound

Felt Terribly Nervous
Regard out... always nervously and free. She should take Lydia E. Pinkham's Vegetable Compound. In tonic action builds up the system. Try it.

BRITAIN READY TO AID CAUSE OF WORLD PEACE

London, Eng.—Stanley Baldwin, Lord President of the Council and leader of the Conservatives in the House of Commons, told guests at the Lord Mayor's banquet, Great Britain would make no further step toward disarmament without similar moves on the part of other nations.

Mr. Baldwin, speaking in place of Prime Minister Ramsay MacDonald who was absent on doctor's orders, declared: "The time has come to us and when Britain can proceed with unilateral disarmament."

He added, however, that the United Kingdom was ready at any time to join other nations in plans which might reduce armaments and bring measures of world peace.

The Conservative leader pleaded for settlement of the war debt problem. "It is essential to the world that ratification of the Locarno settlements on reparations should now become possible and the work begun there should be completed," he said.

He added he wished the success which had attended the Locarno treaty had been reflected in the world disarmament conference, but reminded his hearers that in accordance with the terms of the "gentleman's agreement," fulfillment of the second round of Locarno depends on a more limited debt settlement between creditor and debtor nations.

He reiterated that Great Britain was resolved to stand by her obligations undertaken under the covenant of the League of Nations, and would continue to co-operate with the League in every respect.

From disarmament and war debts, Mr. Baldwin turned to affairs within the empire and to prospects of increased prosperity in empire countries as a result of the Ottawa economic conference.

Of that conference he said: "Favorable, forthright, sympathetic and a sense of one another's requirements, we believe, laid the foundations leading to increased trade between us by lowering economic barriers."

Free State Will Not Pay Land Annuities

Government Not Giving In To Britain Says De Valera

Dublin, Irish Free State.—Eamon de Valera, president of the council of the Irish Free State, told members of the Phoenix Club party, of which he is a member, that "so long as this government is concerned the land annuities will never be paid."

"The new duties against Irish produce we had expected. We know that the United Kingdom would attempt to bully and coerce us and if we give in she will always do so," he said.

Table Supplementary Estimates In House

Total Of \$2,000,000 Added For Present Fiscal Year

Ottawa, Ont.—Further supplementary estimates for the present fiscal year, totalling \$2,000,000, were tabled in the House of Commons by Hon. R. M. Nicholas, Minister of Finance.

The largest single item in the list is an appropriation of \$875,000, a further amount required for unemployment relief under the administration of the Department of Pensions and National Health.

Banana Crop Damaged

Seventeen Thousand Cans Lost Of Three Million Boxes

Kingston, Jamaica.—Fully 90 per cent. of the banana cultivation on this island were wiped out by a hurricane storm which struck West Jamaica.

The centre of the storm hit Point Hope, the western extremity of the island, and the wind registered 75 miles an hour. The damage was estimated at \$2,000,000. There was no loss of life.

Banker Fells Bank

Vancouver Hold-Up Is Reported By Author Of Bank Manager

Vancouver, B.C.—Less than two hours after a bank gunman attempted to hold up the Biltmore Avenue and Oak Street branch of the Royal Bank of Canada, police arrested a suspect who is being held for questioning.

The man was arrested at his home by officers, who stated that on searching his room they found a revolver from which a bullet had been fired recently.

Quick thinking and prompt action by E. Devereaux, manager of the branch, foiled the holdup attempt and demonstrated again that the manager was no easy mark for "stick ups."

Shortly before noon a man entered the bank carrying a match. Going to Devereaux's desk he pointed a gun at the manager. Devereaux immediately dropped behind the counter and reached for his own gun. The bandit fired one shot and fled in a car, which was recovered by police 20 minutes later and discovered to have been stolen from M. Wright.

On July 26 last two men entered the bank and attempted to hold up Devereaux. The manager rushed into his office and fired several shots through the window to attract attention, frightening the bandits, who fled in a waiting car.

New Rules Issued

Conditions Under Which Civil Servants May Hold Municipal Offices

Ottawa, Ont.—The government has issued a list of conditions under which civil servants may hold municipal offices. The order applies throughout Canada.

In all cases permission must be secured from Ottawa before a civil servant contests a municipal election. If the post he seeks carries a salary or remuneration of \$600 or less he may hold it without severing his connection with the government.

If the salary is above that figure, he must secure leave of absence without pay, devoting his full time to the municipal office.

Caught In Flood Of Oil

Two Men Drowned In Frontier Accident At Montreal

Montreal, Que.—Caught in a flood of fuel oil, Flacide Bourgeois, 48, and another man were drowned at the plant of the Imperial Oil Company when a huge tank containing 20,000 barrels of fuel oil burst.

The men were digging nearby, standing in an excavation several feet deep. The gush of oil from the broken tank overwhelmed them and both drowned before help arrived. Details as to how the tank broke were not immediately available, but it was stated there was no explosion of any kind. One body was recovered.

Build More Elevators

Vancouver Only Port In The World To Increase Elevator Capacity

Vancouver, B.C.—By December 33, Vancouver's grain elevator capacity will be approximately 1,000,000 bushels greater than at present, this being the only port in the world today where additional elevator construction is being installed.

Three additions to grain elevators are nearing completion, two of which are expected to be finished by December 1. Thus, Vancouver's present capacity of 14,300,000 bushels will be increased to 15,300,000 bushels.

To Market Canadian Products

Toronto, Ont.—The Royal Merchant Association of Canada announced it would co-operate with the commerce department of Queen's University, Kingston, in plans for an exhaustive study to determine definite information regarding domestic distribution of Canadian products.

Some Tangle Wire Lines

Winnipeg, Man.—Four Manitoba lines—Holland, Glasgow, Beldor, and Cyprus lines—were without electric power for several hours following an aerial attack by a flock of geese on transmission lines. The birds caused a short-circuit, but only three of them were killed.

Wife Of Stalin Is Dead

Most Powerful Figure In Soviet Russia Is Reported

Moscow, Russia.—Nadya Allilueva, wife of Joseph Stalin, most powerful figure in all Soviet Russia, but herself a rising woman who lived plainly, is dead.

The Tass agency, official Soviet news organization, announced her death but gave no details.

She was 30 years old. Only a few months ago she had completed a three-year course at the All-Union Industrial Academy which qualified her as an expert in the production of artificial silk and made her eligible for a high administrative-technical post in an important section of the Soviet textile industry.

In addition to Stalin, their two children—a boy of 13 and a girl of seven—survive her. There also is a stepchild, Stalin's son by a previous marriage, who is 25.

Soldiers On Guard

Units Now Stationed At Federal Penitentiaries In West

Winnipeg, Man.—Steel-helmeted militiamen, with full field equipment and machine guns, are stationed at federal penitentiaries in Manitoba and Saskatchewan.

Twenty-five men were in each detachment to leave Winnipeg fully equipped and supplied with a plentiful quantity of ammunition. The troops dispatched to Prince Albert carried a truck load of ammunition, while both detachments had machine guns.

There are nearly 500 convicts at Prince Albert, while those housed at Stony Mountain total several hundred, probably near the thousand mark.

Sell For Prohibition

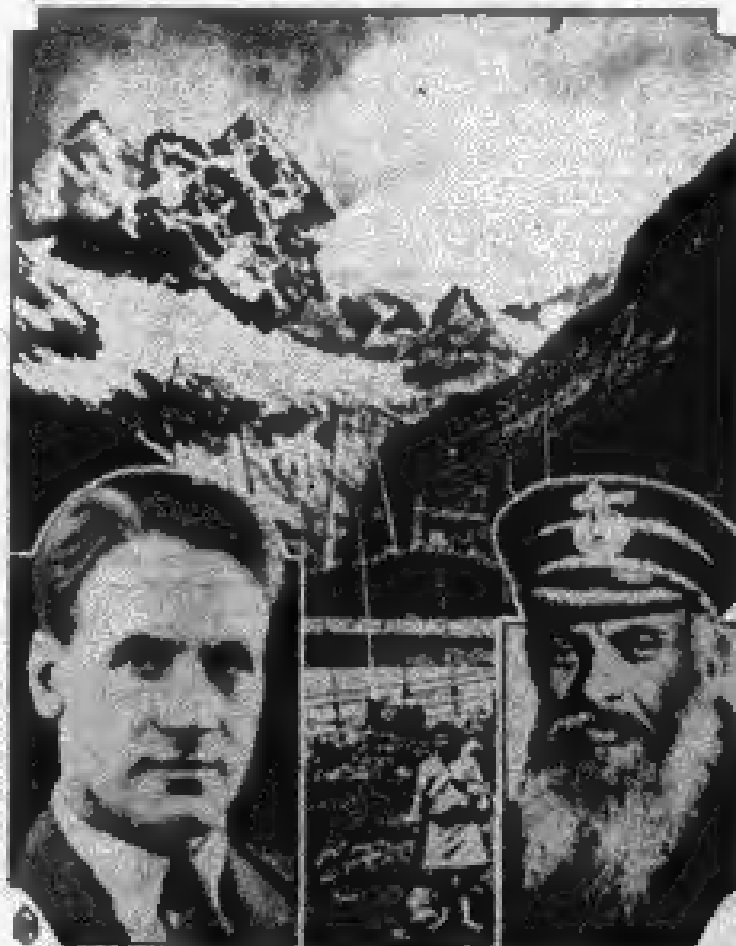

Andrew Volstead Has Not Changed His Viewpoint

St. Paul, Minn.—Andrew J. Volstead said he was still convinced prohibition is the thing for the United States.

Asked to comment on gains made by the wets in the election, he replied: "I have seen too many elections to have national sentiment mean anything to me. I am still for prohibition." He refused to amplify.

Volstead, co-author of the dry act, pertaining his name, is legal adviser to the district prohibition administrator here.

Further Harbours May Conquer By Air

Lord Curzon. — Mr. Evelyn Baring. — Harbours of Empire

With the dual object of promoting British prestige—particularly in India—the Marquess of Dufferin and Clydesdale, British politician, ambassador and Member of Parliament, with a few chosen companions, will take off from Northern Bight sometime within the next few months, in an attempt to fly over the summit of Mount Everest, giant of the Himalayas. Clydesdale is being supported in his partisan ventures by the British Air Ministry and India Office, and the Maharajah of Nepal, in whose territory the mountain is situated, has given permission for the flight. Two planes will make the attempt. One will photograph the other if, and when, it crosses the summit of Everest. This is to provide authentic proof that the feat has actually been accomplished.

MAJORITY FOR ROOSEVELT MAY PROVE RECORD

Washington.—Backgrounding the election of Franklin Delano Roosevelt as United States president, by what promise is to be the greatest electoral majority in the history of the country, Democratic supremacy in the next House of Representatives passed the three-to-one mark as completion of vote-counting moved.

Meanwhile the party figures in the senate approached the border of a two-to-one margin.

Some 75 house seats remained to be heard from, however.

It looked as though Democratic majorities would be increased instead of decreased, but there was nothing finally conclusive as to the final line-up.

From Connecticut to the state of Washington, the mighty rush of Democratic ballots that have the New York Governor to presidency over Herbert Hoover, took heavy and heavily growing toll of "G.O.P." legislators, some of them veterans of many years at the capital.

Outstanding among the latest Republican old guard victims were the veteran Senator Wesley L. Jones of Washington, and Senator Thaddeus L. Oddie of Nevada. Their victorious Democratic adversaries were Homer T. Bone and Patrick A. McCarran.

Other familiar figures who fell before the Democratic hurricane were Reed Smoot of Utah, dean of the senate, where he has served for 30 years; George H. Moses for New Hampshire, president pro tem; James E. Watson of Indiana, Republican leader, and Hiram Bingham of Connecticut, administration stalwart.

The lineup for the short session of the present congress, which expires December 1, was in doubt, with the publicists at, and leading in, one.

Doubts Conference Benefits

Sen. W. E. McMillan Says Agreement Improves Trade

Ottawa, Ont.—"If the 1930 Imperial Conference was anything, the last Imperial Conference was a double-edged, twice-distilled quintessence of nothing," declared Sen. W. E. McMillan (Lib., Alberta), in the House of Commons. He continued debate on second reading of the bill to ratify the Canada-United Kingdom trade agreement.

He was opposed to the agreement, said the former minister of agriculture, for several reasons. He objected to the government's methods of giving preferences by raising tariffs against the rest of the world. Its effect would be to injure Canada's trade.

The agreement had been arrived at under the "threat" of an imposition of tariffs by the United Kingdom on November 15, said Mr. McMillan.

Mr. McMillan had given Canadian wheat a preference with one hand and taken it away with the other, when he insisted that the wheat be sold at world prices, Mr. McMillan said. The only way to secure a preference was by way of a quota.

He had looked for some remedial action on the part of the British government in connection with the necessity of sending Canadian grain by Canadian ports in order to obtain the preference. He could not believe that the government would knowingly interfere with a long-established trade route via Buffalo and New York.

It would cost twice as much to convey the wheat by way of Halifax and Saint John, in the increased costs of freight and storage. While he was prepared to petroline Canadian ports, he did not wish to do so at a price of four or five cents more in the way of expense.

Mr. McMillan felt that the government's first act at the conference should have been to adjust the exchange situation. If this could not be achieved among "members of the same family," how did the Prime Minister hope to obtain it at an international conference among strangers?

The A, B, C of Banking.
"Having had the pleasure(?) of reading, a short time ago, an article in your valued paper regarding Canadian banks, I was surprised that any editor of an up-to-date weekly would reprint such tommyrot from a subsidized daily press," says a correspondent, who continues "I inclose for your edification and also for that of your readers, a short account written by a banking expert of how banks operate; hoping you will find space for it in your next issue. The article is headed 'The Credit Merry-Go-Round,' and reads:

A deposit of \$1000 in a savings account in bank.
The bank lends it to B. B is a farmer who owes it to an implement company. Actually he never takes the \$1000 out of the bank, because the implement company owes the bank a pile of money, and it is placed to their credit. B pays interest on it the he never sees the money.
The implement company C never sees it except that their account is reduced by that amount.
The bank, therefore, still has it.
The bank loans it to D, a grocer, who never sees it, because he owes it to E the wholesaler.
E the wholesaler never sees it, because he owes it to a manufacturer who owes it to the bank.
So far, nobody has seen that \$1000 except the bank manager and A the depositor.
You can add as many more letters of the alphabet as you want and lend it to each one of them, and let them each pay interest, and they still don't need to see the money, for they get the benefit of it.

What's the explanation?
Let B the farmer go to the bank and ask for \$5 to pay the farmer's bill for shooting a horse. The banker declines. The farmer offers his horse as security. On the strength of it the banker gave him a five-dollar bank check (not the gold) and, tho it is only paper, the blacksmith can use it to pay for his services. It is, therefore, acceptable to everyone. Three months later the farmer repays the \$5 with interest, tho, in the meantime the greater turned in the same \$5 bill, and it is used over and over again.
The thing loaned in such case was CREDIT, not MONEY.

Now It Is Narcolepsy.
Of all the genuine excuses given for traffic accidents, one of the most interesting is the irresistible impulse by motor drivers to sleep, which has often ended in disaster for the unlucky driver so afflicted. To this ailment Science has given the name of Narcolepsy.
Doses of ephedrine, a drug used in Chinese medicines as long ago as four thousand years, are now said to be effective in numerous cases of this kind.
One doctor in New York City had a case respond instantly to this treatment after recurring attacks over a period of twelve years, in which the patient had several automobile accidents.

Sportsman Says.
"Doing without them down's pay," says an expert on economy. But I've noticed some people who don't do without don't pay either.
She where an American lawyer announced he is working on a scheme for hunting whale bones by means of the radio. Don't see what difference that'll make, as some think we get now a letter but air over the radio.

The Dual Purpose Tool.
Mike tells a good one. While engaged recently on an contracting job, a laborer who had been riding the radio and had been spotted by truismen, walked up Mike street and asked Mike for two bits for some "cans."
"Are you looking for a job?"
"What kind of a job?" the laborer countered.
"Kin you do anything with a shovel?" Mike inquired.
"Sure thing," said the laborer, "I can try how on it."

Junior Club's Whist Winners.
Ladies' 1st, Miss M. Clarke; Ladies' 2d, Mrs. Larson; Ladies' consolation, Mrs. Becker; Men's 1st, Mr. Yeats; Men's 2d, Mr. Moyer; Men's consolation, Mr. Larson.
The Junior Hockey Club extended a vote of thanks to the merchants of the Town who so generously donated the prizes to the whist drive, and to all who were present, for their loyal support.

U.C.G. Re-elect Officers.
Following adoption Wednesday morning of the financial report 100 delegates to the annual meeting at Spokane of United Grain Growers on Thurs. Nov. 16th showed their emphatic faith in the management of the concern by re-electing the entire slate of officers for the coming year.
E. B. Law of Winnipeg is then again president of U. G. G., which boasts membership of 20,000 scattered throughout the three prairie provinces.
J. J. MacLellan of Purple Springs, Alta., is Vice Pres. and C. C. Jackson of Winnipeg is Secretary.

The Bow-and-arrow Man's Hunter.
Forest Nagler, of Wawaraton, Wisconsin, retains some old-fashioned ideas which he claims are just as effective as modern methods. Especially is this so when hunting big game, as Mr. Nagler for several years past has spent after his moose with nothing more dangerous than a bow and arrow, and he always gets his moose. He goes into British Columbia and spends his hunting holiday north of the C. N. Ry. line between Jasper and Ft. Rupert. A short distance from Longworth, where he had his headquarters this year, Mr. Nagler brought down a bull moose at 47 yards with his bow and arrow. He saw another, but could not get within the proper range. He registered a hit with his first arrow at 35 yards, missed with his second at 40 yards, and brought down his moose at a range of 47 yards.

Oven Bangers for Game.
Ducks and Geese—Sept 15 to Nov 15th.
Magpies, Partridge—Oct 1 to Nov 20.
Sharp-shinned Grouse—Oct. 1-20.
Pheasant—No open season.
Doe—Nov 1 to Dec 15.
Gator, Nov. 1 to May 1.
Beaver, No Open Season.
Moose—Between North Fork River and Tp. 31, March 1 to April 15.

Home-makers, Attention!
In the fish category I found a good one this week, says Editor Ouseport of the Athabasca Echo. Our local hero was one day fishing in the St. Lawrence River when he hooked a whippet. After carefully playing his catch he managed to tug it to shore. It was a real tag he had hooked onto, and, as he pulled it out, proved to be a complete set of harness. It was presumed that a team of horses had got drowned there the ice at some time, and whilst the fish had eaten the horses they had left the harness for the angler.

Chevrolet is a Fully Modern Car, yet Costs Less for Gasoline, Oil and Upkeep

NEW thrills await you behind the wheel of a new Chevrolet Six. Synchro-Mesh gear shifting is the easiest thing imaginable! Free wheeling takes all the effort out of driving! You experience the dash and vigor of "pick-up" of 60-horsepower! And, in addition, you enjoy the full benefit of built-in, six-cylinder smoothness.
Moreover, all these pleasures of modern motoring are heightened by the knowledge that you drive a car that costs less to run. Chevrolet's famed economy starts on the day of purchase—and extends throughout the long, joyful period of Chevrolet ownership. For the new Chevrolet Six, with all its ultra-modern features and advantages, is offered in one of the very lowest price groups! And as far as operating costs are concerned, each day brings new proof that Chevrolet costs less for gasoline, oil and upkeep than any other full-sized car you can buy, regardless of the number of cylinders! Visit our showrooms—get the facts and figures on Chevrolet economy now. You'll be convinced that Chevrolet's new Six is the car to buy for modern, low-cost transportation—the Great Canadian Value!

THE HOUSE OF DREAMS-COME-TRUE

— BY —
HARRISON FRISBIE

Author of
"The Spectral Palace," "The House
of the Dead," "The House of the
Dead," "The House of the Dead,"
Harrington & Harrington, Ltd., Toronto.

CHAPTER XXXVII.—Continued

She was lying on her back in the study wood whether they had ridden out to lunch that day, staring up at the bits of blue sky overhead which showed between the interlacing branches of the trees. The remainder of the party were grouped around her, reclining in various attitudes of a "dive for peace" nature, while from a little distance away, where the horses were picketed in charge of a groom, came the drowsy, rhythmic sound of the munching of oats, punctuated by an occasional stamp of an impatient hoof.

"Yes, it's been good," agreed Lady Anne. "I shall never settle down again, properly as a dowager at the Down House!" And she laughed gleefully.

To her, it had been almost like a return to the days of her youth, for "her four children"—as she called them—had insisted on her sharing in all their active pursuits, and Lady Anne, who in her girlhood and early married life had been a first-class horsewoman and a magnificent swimmer, had consented "con amore."

Miss pulled herself heavily up into a sitting posture and glanced towards the crimson glow of westerling sun where it struck against the tall trunks of the trees.

"You'll none of you live to go back to England, instead, you'll be dying of pneumonia and a few other complaints—if we don't get a move on soon," he observed. "It's almost sunset, and after that it grows absolutely chilly in this eastern province of Jean's. Besides, I fancy it's going to blow good gone before long."

It was true. Already a little chill whiff of wind was shaking the tops of the trees, and before the party was fairly mounted and away, the whiff had changed to a shrill whistling, heralding the big gale which drove along behind the imminent evening breeze which at first had barely ruffled the topmost branches.

It was a longish ride back to Bel-

tele, and the sun had dipped below the horizon in a million splendor of purple and red before the shoulder of the hill, upon the further side of which the castle stood, came into sight. Now and again the moon peeped out between the racing, wind-driven clouds, clearly showing the bold black curve of the hill against a background of lowering sky.

Jean and Blaise were riding abreast, a little in advance of the rest, engrossed by the difficulties of carrying on an animated conversation in a high wind. As they swung round the bend in the road which brought the hill's great shoulder into view, Jean threw back her head and stared at the sky above it with a puzzled frown on her face.

"Why . . . how queer!" she exclaimed. "The sun set nearly half an hour ago and yet there's still quite a brilliant red glow in the sky. Look, Blaise—just above where Beladale stands."

Blaise glanced up quickly in the direction indicated, then suddenly reined in his horse and half-ran in the stirrups, staring at the red glow disappearing in the sky ahead.

"That's no sunset!" he exclaimed sharply. "It's—Great heavens, Jean! Beladale is on fire!"

Even as he spoke a tongue of flame, reaching the dull glow with its gleaming bloom, shot up like a thin red lance into the sky and sank again.

A shout came from behind. The others had seen it, also, and recognized its deadly import. The next moment the clatter of galloping hoofs echoed along the road as the whole party urged their horses on towards home as fast as they could over the ground.

Soon they struck off from the road, taking a bridle path which skirted through the woods climbing the base of the hill, and as they emerged on to the broad plateau where Beladale had stood centuries through wind and weather for so many years, the whole extent of the catastrophe was revealed.

By this time the angry glow in the sky had turned dark into deep, white from the down and showers of the castle had vanished forth as from a furnace—spread in long, flame tongues of flame, filling the blackened walls, descended in spangled showers of sparks that drifted towards the earth like flights of golden butterflies.

Little groups of men and women, helms as high as they the fire, rushed hastily hither and thither with buckets and engines, while on the smooth road which fringed the castle lay piled enormous quantities of household stuff, a motley of fine old furniture, fine tapestry stretched from the place against the walls, pictures, mirrors—anything and everything that could be dragged out into the open by eager hands and willing arms.

The major-domo, an elderly, grey-haired man who had been here and there upon the estate and who had taken service with Ogle Pycroft as

the day when he had first brought Jeannette, a bride, to Beladale, caught sight of the rising party returned and came hurrying to Jean's side.

The house were running down the driveway fast as he recounted the discovery of the fire, which must have started either just before or during the previous dinner-hour, when few people, of course, were about the castle, and which had obtained a firm hold before it was detected.

The household staff, pressed to a limited extent—a fire drill had been held once a month in Pycroft's time—had done their best to cope with the flames, but vainly. The high wind which had arisen had thwarted their utmost efforts, and finally giving up all hope of moving the interior from being gutted, they had confined themselves to rescuing such valuables as could be easily removed.

There was the usual mystery as to how the fire had originated, and several circulated amongst the clattering throng which hurried hither and thither, momentarily augmented by the peasants who, at sight of the castle in flames, had come trooping up the hill from the village below.

The most likely story, and the one to which Blaise inclined to give most credence, was that the child of a woman who worked daily at the castle, escaping from his mother's care and launched on an independent voyage of discovery through the rooms, had leaped over a burning lamp. Then, terrified at the immediate consequences—the sudden flaring of some ancient tapestry, dry as tinder with the summer heat, near which the lamp had fallen—he had leaped away, out of the castle and so home, too scared to tell anyone of the accident.

But, as Jean commented sarcastically, what did it matter how it happened? Except from the precise viewpoint of the fire insurance company, who would probably desire to know all kinds of details that it was impossible to supply!

For her, nothing mattered except that Beladale, her home from childhood and the place where she and Blaise had prepared to spend a great part of their married life, was a furnace of flames.

It was a splendid but very terrible sight. The great grim walls of the castle stood four-square against the sky, charred and blackened but defiantly impervious to the flames that were licking voraciously against the solid stone which flanked them. Limited to the very end, they reared themselves unvanquished, gaunt and still, though all that they had sheltered through their centuries of watch and ward lay consumed within their very heart.

Jean, standing beside Blaise and watching the upward-leaping flames and the crimson banner of the lowering heavens, spoke suddenly:

"And the sky is red as blood

Quick
RELIEF
from pain

A lot of things can cause a headache or other pain, but there is one thing that will always give you relief! Just take a tablet or two of Aspirin. Your suffering ceases. Relief comes instantly, regardless of what may have been making your head throb with pain.

Aspirin is harmless—cannot depress the heart. So there's no use waiting for a headache to "wear off." It is useless to endure pain of any kind when you can get Aspirin. It is a blessing to women who suffer regular systematic pain; to men who must work on, in spite of sprains, fatigue or nervousness.

There is quick relief for colic, for neuritis, rheumatism, toothache. Be sure to get Aspirin—and not a substitute. All druggists sell Aspirin tablets. "Aspirin" is a trade-mark registered in Canada.

EVEREADY

THE SECRET OF LONGER SERVICE

Have battery for your car, home, office, store, or anywhere else. Eveready LAYERS is the biggest factor in saving you money at the market today.

Get the secret, ever-lasting power that only an Eveready LAYERS can give. Buy the battery that is guaranteed to last with safety, quiet, and perfect service. Remember that a LAYERS has no weak cells and never gives out a "dead" battery. That's the secret of longer service. Eveready LAYERS—every inch works for you, every ounce counts to service, saving and satisfaction.

Eveready LAYERS Radio Batteries are now selling at lowest prices—they don't have your dealer today.

above it," Blaise, the last of Beladale's family's prophetic has come true!

An hour later help was forthcoming from the distant town to which a messenger had been dispatched post-haste as soon as it was realized that the household staff, even with the assistance from the village, was hopelessly inadequate to cope with a fire of such magnitude. But it was already too late to accomplish very much in the way of salvage. All that remained possible was to quench that inferno of fire as soon as might be and so, perhaps, save some of the outbuildings.

Hour after hour through the night, human endeavor fought with the flames—extinguishing them again and again only to find them leaping into fresh life at the gusty bidding of the wind, leaping really from the lambent heart of the conflagration, which glowed and pulsed and heaved like some living monster intent upon destruction.

It was not until dawn was breaking, that, with the dying down of the wind, the flickering crimson light on lower level, when the fire had been held finally from the sky; and a half at least extinguished, the village folk, gathered about the scene of the catastrophe, had dispersed to their homes.

Lady Anne, accompanied by Nick and Claire, started for the top of the Green Dragon, whether the landlord had hurried on ahead to prepare temporary quarters for the new household with company from the castle. But Jean and Blaise still lingered by the deserted ruins left to say farewell to the place that had meant so much to them.

Through the early hours of the morning morning sky, framed by little ragged smoke—conspicuous at the horizon which had passed—stood all that remained of Beladale—blackened, solid walls, stark against that tender blue, brooding above the mass of smoking wreckage.

Jean's mouth quivered a little as her glasses took in the scene of utter devastation.

"My House of Dreams!" she whispered brokenly.

She was silent a few moments, her eyes catching all that had once been Beladale in a gaze which held both

forward and retrospect. And something more—some vision of the future. In the dawn-light peering the sky above she recognized the eternal promise of Him Who "commanded the light to shine out of darkness."

Her House of Dreams! The last meaning of the song had grown suddenly clear to her.

When she turned again to Blaise, her expression was serene and tranquil. Touched with regret perhaps, but bravely confident.

"I don't think it matters, Blaise," she said simply. "Beladale was only a symbol, after all. My House of Dreams-Come-True isn't built of stones and mortar. No one's is. It's just—where love is."

THE END

Why suffer needlessly! Douglas Egyptian Liniment brings quick, sure relief to aching feet, stiff joints and aches. Relieves inflammation. Restores good blood.

Canadian Members Choose

A committee of five has been named by the executive of the Canadian Chamber of Commerce to act as the Canadian members of a joint committee being established by the United States and Canadian Chamber of Commerce for the discussion of problems affecting the business relations ships of the two countries.

U. F. A. Convention.

The delegates to the an-
nual convention of the Stony
Plain U.F.A. Provincial Con-
stituency Assoc. met here on
Saturday, the 12th, to the
number of about 200.

Owing to the disagreeable
weather for traveling, not so
many as expected were pre-
sent when the morning session
opened. Following the dinner
hour the delegates began to
arrive in greater numbers.

The delegates were called
to order in Moose Hall for
the morning session by Mr
W. M. Washburn, a former
M.L.A.

Those on the platform with
the Chairman were: J. Russell
Love, M.L.A. for Wainwright;
N. F. Priestley, vice president
of U.F.A.; Mrs. Watt, of the
U.F.W.A.; Donald MacLeod,
our Assemblyman. Premier
Brownlee was unable to be
present, and sent his best
wishes for the success of the
convention.

The addresses given by the
speakers were listened to at-
tentively by those present.

Among the resolutions pre-
sented were: "Urging that ru-
ral municipal relief officers be
declared ineligible for other
offices, on the complaint that
party politics are played by
these officials."

"The cessation of all inter-
est charges on farm loans,
mortgages, agreements of sale
and liens, back to July 31,
1939, and until such time as
prices of farm produce exceed
the cost of production."

A third resolution read:
"That no foreclosure of farm
mortgages should be permitted
until one year after farm pro-
duct prices reached parity."

Stony Plain was selected as
the place for the convention in
1933. Officers elected are:
E. W. Terry, Tomahawk; Vice
Pres., R. J. Barnes, Hansena;
Directors: H. Michel, Holborn;
W. F. Broadbent, Winterton;
W. Fife, Magnolia; Mrs. W. T.
Propp, Holborn; Mrs. E. J.
Barnes, Hansena.

Delegates were present from
Holborn, Hanson, Graven, Spruce
Grove, Gramina, Winterton, De-
field, Magnolia, Lake Isle, Becker
Rapids, Dargel, Highvale, Knap
Hill, Sora, Beach, Tomahawk.

Card of Thanks.

On behalf of the Stony Plain
U.F.A. Constituency Association,
we wish to take this opportunity
of thanking all those townspeople
who so kindly rendered their ser-
vice to make our Convention a
success.

W. T. PROPP, President.
R. J. BARNES, Secretary.

Holborn Boys Win Cup.

Hurray for Holborn! The boys
after a very strenuous year, have
won the cup for the Alberta cham-
pionship for the Standing Field
Crops. The boys have done their
part, and we think it's up to us to
show them our appreciation, by
giving them a supper or an enter-
tainment at the presentation of the
cup.

By so doing, the boys would be
more interested and will struggle
still more to uphold our motto—
"Alberta's Banner District."

It will be to our interest, when's
join hands together about the
best table and give them a hearty
vote of thanks for their work.—
(Continued)

Beware the Burglar.

At an early hour Sunday
morning the kitchen at the
Royal hotel was entered and
some food and kitchen uten-
sils are missing.

At Spruce Grove, the same
morning, some party, as yet
unknown, took a dippy box
which had been locked to the
stem of an anchored auto,
removed it to a vacant lot,
and lashed it open. A tray
cream can was taken over to
Dave Bell's gas pump, where
the lock and possibly some
petrol removed. Several other
very mischievous pranks were
played.

Merchants, Householders,
and others should take extra
precautions at the present
time to prevent marauders
from entering their premises.

Carbers' Annual Meet.

The annual Curling meet-
ing was held in the town hall on
the evening of Nov. 9, and
was well attended. The meet-
ing opened with Mr. McCulla
in the chair.

Secretary Lewis's report on
last season's activities proved
satisfactory; and other busi-
ness was then disposed of.

The election of officers then
took place, with the following
result:

Pres.—Mr. McCulla.
V. Pres.—Mr. Connolly.
Secretaries—W. H. Lewis
Executive—A. E. Michael,
O. G. Wudel, Jas. Malloch, R.
E. Wood, J. P. Gannon, Hy
Oppertshauer.

Fees for the ensuing season
were set at:
Stony Plain member, \$10.00
Spruce Grove member, 7.00
Ladies, 2.50

A special rate of \$5 for the
season was passed for the ben-
efit of new members who had
never curled before with this
club or any other club. With
this inducement, we hope to
see a number of new members
in the ranks.

Notices.

Hall, by Stony Plain Wom-
en's Institute.
18—Concert in Moose Hall.
22—Holborn & Tomahawk
Concert.

Stony Plain and District.

Mr. and Mrs. Joe Becker
and family spent Sunday with
friends in the Fort Saskatchewan
district.

Mr. Sam Guelch has re-
turned from Vancouver.

Members W. Peters and Bert
Becker have gone to Edmon-
ton to reside, where the lat-
ter named has secured a po-
sition in a large retail store.

Mr. R. C. Howar, the Ings
delegate to the Convention in
Calgary of municipal districts,
left for the South on Tuesday.

Walter Brix, a prominent
merchant of Spruce Grove,
was in Stony on Monday, do-
ing business.

Local hockey games are
now in sight—Mr. Gus Zucht,
this season's caretaker, intends
flooding the rink this week.

The first of the Christmas
season school entertainments
has been dated. Tomahawk &
Holborn pupils will gather in
the Hall Friday Evg., Dec.
22nd.

Obituary.

Mrs. Mary Barbara Schwa-
nak, beloved wife of August
Schwanak of Golden Spike,
passed away on Monday, No-
vember 14, in her 20th year.

She leaves to mourn her
loss, beside her husband, an
infant son, Milton George, her
mother and father Mr. and
Mrs. Geo. Ducholke.

Three sisters—Mrs. Val.
Ursel and Mrs. R. Schultz of
Golden Spike; Mrs. R. Guelch
of Spruce Grove.

Two brothers—Henry M.
and Edward, of Golden Spike
district.

The funeral will be held
today (Thursday) Nov. 17th,
from the home of Mr. George
Ducholke.

A service will be held in
St. Matthew Lutheran church.
Rev. Emil Kierhardt, pastor.

Interment will be made in
St. Matthew churchyard.
